

4-Week Beginner Gym Plan

Three full-body sessions a week for complete beginners, with sets, reps and how to add weight safely each week.

How it works

- Train 3 days a week with a rest day between (e.g. Mon/Wed/Fri).
- Warm up 5 minutes on any cardio machine, then 2 light sets of the first exercise.
- Pick a weight you could lift 2-3 more times at the end of each set.
- When every set hits the top of the rep range, add the smallest weight step next session.
- Check with a doctor first if you have a health condition. Stop if anything hurts sharply.

Session A

- Goblet squat 3 x 8-12
- Dumbbell bench press 3 x 8-12
- Seated cable row 3 x 10-12
- Romanian deadlift (dumbbells) 2 x 10-12
- Plank 3 x 20-40 s

Session B

- Leg press 3 x 10-12
- Lat pulldown 3 x 10-12
- Seated dumbbell shoulder press 3 x 8-12
- Glute bridge 3 x 12-15
- Dead bug 3 x 8 each side

Weekly plan

- Week 1: A, B, A. Learn the movements, finish every set with 3 reps left.
- Week 2: B, A, B. Same exercises, add weight where reps were easy.
- Week 3: A, B, A. Add one set to the first two exercises.
- Week 4: B, A, B. Keep the extra set, aim for the top of each rep range.
- After week 4: repeat with heavier weights or move to the 12-Week Strength Builder.
